### **C for Loop (With Examples) - Programiz**

In C++, you use `std::string`, and if you have to interop with a C API, then that's what `c_str()` is for. There's no need for the programmer to deal with `char[]` or NULL termination in any of that. The C-style string handling is completely and utterly and totally deprecated for every possible use except interop with old C code, which is perfectly ...
